

## Looking for a Speaker for your Virtual Support Group Meetings?

Binding Site, makers of Freelite<sup>®</sup>, the free light chain test, has a Scientific Affairs team available to provide talks at IMF virtual Support Group meetings.

### Topics include:

- Freelite<sup>®</sup> tests, serum protein electrophoresis, and serum immunofixation as methods currently used in diagnosing and monitoring multiple myeloma.
- Current International Myeloma Working Group (IMWG) guidelines for diagnosing and monitoring MM.
- The design and expected outcomes of the iSTOP MM study, plus some of the preliminary results (if available).
